EXPERIENCE

Jan 2019 to
Current

Acteon, Calgary, Alberta
Founder
- **Founded Actaeon and worked as a contractor developing front-end and back-end solutions for client.**
- Doubled clients monthly visitor count.
- Developed site with CRUD based API structure in JavaScript, HTML, CSS, PHP and MySQL.
- Consulted modern web practices and worked with client to meet product specifications.

Oct 2015 to Sept 2018

Memory Express Computer Products Inc, Calgary SE
Sales Representative / Customer Service Representative
- **Hired as computer sales consultant and moved into service department after one year.**
- Consistently exceeded monthly sales requirements generating hundreds of dollars in extra profit per month
- Worked to find proper product solutions for clients including large businesses buying multiple systems, and minimizing return rates.
- Created and closed detail oriented service orders preventing company liability and creating return customers.

Oct 2007 to Apr 2011

IBM (International Business Machines), Calgary
Contractor
- **Private Security Officer and acting Security Administrator for three locations in Calgary including high security server area.**
- Responded to major disaster when server failure caused all security systems to break down and prevented possible security breach.
- Prevented unauthorized access to secure space.
- Responsible for overseeing and necessitating contract repairs for defective security systems, including testing and maintenance, and determining access levels for RFID badges through proprietary software.
